Applications:

Mechanical Wrist Watch is a classic timepiece that is driven by the mechanics of the watch movement and requires the wearer to manually wind the watch for it to work. This stylish wristwatch has a **stainless steel case with a 10mm thickness and a 40mm diameter**. The dial of this watch is white in color and it is powered by a mechanical movement. It also comes with a **2-year warranty** to ensure the quality of the product. This watch is perfect for those who appreciate the craftsmanship and precision that goes into creating a manually-wound watch. It is also an ideal choice for those who want something unique and different from the many quartz-powered watches on the market. With its classic styling and mechanically-driven design, the Mechanical Wrist Watch is sure to be a timeless piece that can be passed down for generations.

Customization:

Customize Your Mechanical Wrist Watch

FAQ:

Mechanical Wrist Watch

Q: What is the water-resistance of a mechanical wrist watch?

A: Generally, mechanical wrist watches have a water-resistance rating of up to 30 meters.

Q: What kind of battery does a mechanical wrist watch use?

A: Mechanical wrist watches do not use batteries, as they are powered by a mechanical movement.

Q: How does a mechanical wrist watch tell the time?

A: A mechanical wrist watch uses a series of gears and springs to move the hands of the watch in an analog fashion.

Q: What is the difference between a mechanical and a quartz wrist watch?

A: A mechanical wrist watch is powered by a mechanical movement, while a quartz wrist watch is powered by a battery and quartz crystal.

Q: How often should I service my mechanical wrist watch?

A: It is recommended to service your mechanical wrist watch at least once every five years.
